AMCOM'S Conflict Material Policy

AMCOM is committed to social responsibility and strives to maintain the highest ethics throughout its business practices. We fully support the Dodd-Frank Act and EICC legislation and are taking all necessary steps to comply with its requirements.

As a semi-conductor company, a portion of AMCOM's products do contain traces of the metals Tantalum, Tin, Gold, and Tungsten. Although AMCOM does not procure these metals directly from mines or smelters, we are taking due diligence to ensure that all products from our suppliers are conflict-free.
